

UNIT Protocol – Technical & Ecosystem Whitepaper v1.3

BNB Smart Chain (BEP-20) Utility Token Infrastructure

Overview

UNIT Protocol (UNIT) is a BEP-20 utility token deployed on BNB Smart Chain. The protocol is designed around transparent on-chain configuration, fixed supply mechanics, and verifiable token allocation.

Token Overview

Network: BNB Smart Chain (BEP-20)
Maximum Supply: 1,000,000,000 UNIT
Minting: Disabled

Distribution Framework

Strategic Reserves: 30%
Contributors & Builders: 25%
Public Ecosystem Distribution: 15%
Ecosystem & Partnerships: 10%
Liquidity: 20%

Staking Program

Staking is live on BNB Smart Chain. Reward pool funded with 5,000,000 UNIT. Lock options: 30 / 90 / 180 / 365 days.

Transparency & Governance

All token allocations, transfers, and staking operations remain publicly verifiable on-chain.

Risk Disclaimer

UNIT Protocol is an experimental digital utility token. Nothing in this document constitutes financial or investment advice.
